## EDUCATION

### McMaster University

Hamilton, ON

*Biomedical and Mechatronics Engineering, Year 3; GPA: 4.00*

**Relevant Courses:** IBEHS 1P10A/B; Grade: A+, IBEHS 1EP6A/B; Grade: A+, IBEHS 2P03; Grade: A+

**Awards:** Provost Honour Roll, McMaster Award of Excellence, Yates Scholarships, Alexander Rutherford Scholarship

## TEACHING EXPERIENCE

### Teaching Assistant: Advanced Calculus and Differential Equations

September 2024 – April 2025

*McMaster Department of Mathematics and Statistics*

*Hamilton, ON*

- Led tutorials of **400+ students**, hosting in-person and online office hours to support student comprehension and practice.
- Created practice problem sets, hosted review sessions, and adapted explanations to a wide range of learning styles and knowledge levels, accumulating **over 230 hours** of teaching experience.
- Drove measurable results, with students improving grades by **upwards of 30%** between assessments.

### Private Tutor

May 2024 – November 2024

*Tutorax*

*Hamilton, ON*

- Over 120 hours** of tutoring experience in high school and university calculus and physics.
- Assessed individual areas of struggle and determined **optimal teaching strategies** tailored to each student.

## BIOMEDICAL & PROFESSIONAL EXPERIENCE

### MED-T: Medical Engineering Design Team

*Member and Co-President*

*October 2023 – Present*

- Lead one of McMaster's largest biomedical clubs, managing roughly **10 teams and 100 members** running workshops, guest lectures, hackathons, and research/design projects alongside professors, physicians, and industry professionals.
- Build new initiatives and educational opportunities to expand biomedical outreach and student development, resulting in **measurable real-world impact**.

### Electrical Engineering Intern

May 2024 – December 2024

*Arche Biotechnologies*

*Hamilton, ON*

- Designed a **novel medical device** addressing continuous bladder irrigation, applying knowledge of urological anatomy and physiology to save nurses **hundreds of hours** yearly.
- Prototyped and tested components to ensure reliable, patient-safe functionality.

### Software Product Manager

May 2025 – August 2026

*Advanced Micro Devices (AMD)*

*Calgary, AB*

- Simplified complex technical concepts around GPU programming into clear terms for broad, non-specialist audiences, authoring requirement documents and coordinating cross-functional teams.
- Supported AI/HPC software enablement underpinning research in life sciences, computer vision, and robotics.

## SELECTED BIOMEDICAL PROJECTS AND INITIATIVES

### Myoelectric Hand Prosthetic — MED-T Prosthetic Team

June 2024 – April 2025

- Developed a **low-cost myoelectric hand prosthetic** for amputee patients, applying **musculoskeletal anatomy** to design, test, and manufacture functional components.

### Medsprint Biomedical Hackathon — MED-T Project Manager

June 2024 – May 2026

- Led MED-T's annual two-day **biomedical hackathon**, connecting competitors with community partners, professors, and physicians to build real-world health solutions that have spanned **rehabilitative care, neurodegenerative disease, stroke, and more**.

### Dementia Assistive Device — MED-T Innovators Team

October 2023 – May 2024

- Designed an assistive device** for patients with mid-to-late-stage dementia to support caregivers, including geolocation tracking and fall detection to assist in emergencies.
